Java Developer

COMPANY NAME: Confidential
COMPANY INDUSTRY: Engineering
POSITION INDUSTRY: Engineering-Other Engineering
POSITION LEVEL: Associate
POSITION LOCATION: Maryland

POSITION DETAILS

Company Profile:
The company engineers a diverse portfolio of high technology solutions, products and services that enable customers to successfully execute missions across all domains of operation. We apply advanced technologies such as Artificial Intelligence, Blockchain, AR/VR, Cloud Native and Quantum Physics to solve our customers' missions in cyber, RF, undersea, interstellar space and everything in between.

With a global team of 12,000+ top professionals, we partner with the best in industry to expand the bounds of innovation in the defense and scientific arenas. Given the nature of our work and who we are, we value trust, honesty, alignment and transparency. We offer highly competitive benefits and pride ourselves in being a great place to work with a shared sense of purpose. You will also enjoy a flexible work environment where contributions are recognized and rewarded. If who we are and what we do resonates with you, we invite you to join our high performance team!

The company is an Equal Opportunity/Affirmative Action Employer that is committed to hiring a diverse and talented workforce. EOE/Disability/Veteran

What You'll Do

Key Responsibilities:
Working successfully within a team, the Java Developer will assist project leaders in the research, design, development and testing of software and tools, to include development of new products/applications or enhancing existing applications and systems. Your talent will be front and center.

Java Developers have the opportunity to work on an Agile team to design and develop a wide array of K8s and Spring Based high data rate Microservices with cutting-edge technologies including AWS, Docker, Kafka, Kubernetes, Cassandra, Java 11, Kotlin, ReactJS, Spring Boot/Cloud/Data, ElasticCache, RDS using tools like Maven, Nexus, Node, Neo4j, Yarn, vscode, Git, IntelliJ, Gitlab, SonarQube.

This position provides an opportunity to further advance the cutting-edge technology that supports some of our nation's core defense/intelligence services and systems.

Help make the technologies, products and services that make a difference. That's the opportunity that's waiting for you at our company. We help our nation's heroes keep our nation safe by creating solutions so advanced, they redefine innovation for the world. It's an amazing challenge. And it's waiting for you now.

Java Developer
